Press Release

Northern Colorado Air, Inc. promotes installation and service excellence through NATE certification

Local Technicians Pass National “Excellence” Test – Homeowners Benefit

Fort Collins, Colorado, Sept 1, 2011 What do you do if you’re a homeowner with a heating or cooling equipment problem but you don’t know a reliable, knowledgeable technician? Do you just pick someone randomly out of the phone book, or ask a friend who may not know more than you do? How do you know if the technician you pick really knows what they’re doing?

North American Technician Excellence (NATE) has developed and administered national certification tests, which are offered to technicians in the areas of heating, ventilation, air conditioning, and refrigeration. The independent, not-for-profit organization is supported by an unprecedented combination of technicians, contractors, manufacturers, distributors, utilities, and heating and cooling contractors.

Northern Colorado Air, Inc. of Fort Collins and Longmont is proud to announce that the following technicians passed the NATE tests and have been recertified.

- Bobby Kohn
- Kevin Bergstrom
- Mark Hughes
- Benjamin Dewitt
- Ronny Allen
- Scott Ziegler
- Jeff Richard, General Manager

This certification benefits local homeowners by giving them an independent standard by which to select a knowledgeable technician to work on their home comfort system.

“This certification really helps,” said Jeff Richard, NCA’s General Manager. “It’s a way that we can show our customers that we really care about doing the job right, and that we know how to get it done right the first time.”

“Heating and cooling contractors today are trying to improve their industry’s image,” says NATE spokesperson Pat Lampel. “This certification test is national, independent, focused on current technology, and aimed at a high standard for technicians, so only the best will pass. This encourages all technicians to improve their skills in order to keep up with the pack, and that improves the overall industry for everyone!”

For more information about Northern Colorado Air, or to set up an appointment for a free indoor air quality analysis or home comfort evaluation, call 970-223-8873 or visit their website at www.ncagriff.com. For more information about NATE, call Pat Lampel in Arlington, VA at 703-600-0361 or go to www.natex.org.
